As the Indiana University Ph.D. in Information Science celebrates over 50 years – and over 185 graduates – we are pleased to accept applications to our program. Our doctoral program is one of the longest continuously running Information Science programs in the U.S. and has one of the highest number of graduates. Deans of iSchools and libraries, Distinguished Professors, Directors of Doctoral Programs, Editors of journals, and Presidents of national professional associations are all positions that our graduates have held.

Located in the ideal university town of Bloomington, Indiana, the program is supported by both an extensive research infrastructure and a beautiful setting. The technology and library resources at IU are stellar while the abundance of and access to nature, the arts, and international cuisine in Bloomington enrich out-of-class hours.

**Funding packages up to $50,000 per year are available for top candidates.**

Contact: Dr. Noriko Hara (nhara@indiana.edu), Ph.D. Program Director, with questions.

Our Doctor of Philosophy in Information Science trains the next generation of information scientists—the people who will advance the knowledge in this field. Doctoral students are advised by faculty who are engaged in cutting-edge research areas such as:

- social informatics
- information visualization
- social media
- scholarly communication
- digital humanities
- complex network analysis
- information retrieval
- digital libraries
- computer mediated communication
- digital curation
- online communities
- data science
- scientometrics
- data & text mining
- web science

Our students can benefit from our active community of scholars that includes these Research Centers:

- Catapult Center for Digital Humanities and Computational Analysis
- Cyberinfrastructure for Network Science (CNS) Center
- Rob Kling Center for Social Informatics (RKCSI)
- Center for Computer Mediated Communication Research (CCMC)
